NATURAL VITALITY FOR YOUR SKIN

MICRO
pearl

MOISTURIZING ANTI-AGING CREAM

SPF 15 medium protection

Natural pearl powder has the virtue of restoring luminosity and tonicity, smoothing wrinkles, eliminating toxins and roughness from the skin as well as marks; it has been used by both men and women in traditional Chinese medicine for more than 2000 years.

The daily use of micro pearl powder, by means of its participation in the metabolism, improves immunity, accelerates the growth of new cells which make the skin smoother, more elastic (anti-age action); favouring the elimination of roughness and cutaneous toxins (whitening and anti-mark action); and together with the other active principles, restores youthfulness and luminosity to the facial and neck skin, naturally without being aggressive.

The daily use of micro pearl powder is a UNISEX product ideal for all skin types as a moisturizing cream base anti-age during the day. Especially recommended for mature skins.

The sun protection factor 15 medium protection, complies with EU/Colipa, US FDA, Australian Standard normatives and the Colipa recommendations (UVA protection), and together with Tocopherol (a potent natural antioxidant), vitamins pertaining to B, E, A and F groups, protect the skin from premature ageing due to UVA and UVB radiation.

Oils obtained from Rosehip, squalan and Shea Butter, guarantee that the product does not contain any mineral oils in its composition and for this reason does not make the skin at all greasy, thanks to its high penetration capacity.

The moisturizing factors will protect your skin all day long; the resulting silky skin effect is lasting and is noticeable from the first application, and its delicate perfume will remind you that the micro pearl continues to act on your skin.
